Task 1:

We are going to have to combine the tables we created. Here we will use the VLOOKUP operator in Excel. To get a little practice with VLOOKUP, try the following example.

Input Table:

ID	Count
A	1
B	6
D	3

Map Input Table (use this conversion):

Value	Color
1	Red
2	Blue
3	Green
4	Yellow
5	Cyan
6	Magenta

Desired Output Table:

ID	Color
A	Red
B	Magenta
D	Green
