

Second Activity

Sept. 21, 2010

1. Use conditional formatting on this table to color the cell backgrounds a greenish tint if the two senators agree (i.e., if the agreement score is close to 1.0), a reddish tint if they disagree (score nearly -1.0), and white if they are essentially independent of each other (agreement score of 0.0). Why are there very few red squares?
2. Now try to locate someone similar to Feingold, in the same sense as the previous activity.
