

Homework 5

Due: Sept. 21, 2010, 2:25 pm

Reminders

For the following problems you may discuss the concepts that will help solve these problems with classmates and course staff. You may *not* simply copy down the answers of your classmates as that is a violation of the collaboration policy. The one exception to this rule are those problems marked as Independent. You may discuss independent problems *with course staff only*.

Task 1:

- a. Create a website on Google pages that displays the results of your in a nicely formatted way. Keep in mind the aspects of good web page design that were discussed in class. Add explanatory text about the meaning of your data. This is mostly an open-ended assignment. The most important part to keep in mind is that your page should be able to convey information about what you've done to an audience who has not taken (or TAed!) the class.

Handin

Task 2:

E-mail the URL of your page to `cs0931tas@cs.brown.edu`.
